Institut Notre-Dame du Sacré Coeur A.S.B.L. - BELGIUM

Collège "La Sologne" - FRANCE

Topeliuksen koulu - Turun sivistystoimiala - FINLAND

Istituto Comprensivo Lucignano - ITALY

The project is part of our European Development Plan started few years ago and will contribute to achieve the objective of internationalization of our institutes. All the partners involved in this project proposition have previous experience in Erasmus+ projects and we met each other in different project mobility KA1 and KA2.

The main idea of this project proposal is to create a link among the goal of the Agenda 2030 and the European priorities for the school education.

We want to make students and families aware of more responsible attitudes, to realize that each single action will be important to improve the quality of their life and of the next generations.

The project involves associations, parents, local authorities, specialists and the local community.

4 mobilities focused on 4 different Agenda 2030 goals:

- n°4 Quality of education- Belgium - March 2022
- n°3 Good health and well being - Italy - May 2022
- n°15 Life on Land Conservation of Biodiversity - France - October 2022
- n°13 Climate action - Finland - May 2023

Le projet fait partie de notre plan de développement européen lancé il y a quelques années et contribuera à atteindre l'objectif d'internationalisation de nos instituts.

Tous les partenaires impliqués dans cette proposition de projet ont une expérience antérieure dans les projets Erasmus+ et nous nous sommes rencontrés dans différents projets de mobilité KA1 et KA2.

L'idée principale de cette proposition de projet est de créer un lien entre l'objectif de l'Agenda 2030 et les priorités européennes pour l'éducation scolaire.

Nous voulons sensibiliser les élèves et les familles à des attitudes plus responsables, pour réaliser que chaque geste sera important pour améliorer la qualité de leur vie et celle des générations futures.

Le projet implique des associations, des parents, des autorités locales, des spécialistes et les communauté locale.

4 mobilités centrées sur 4 objectifs différents de l'Agenda 2030 :

- n°4 Qualité de l'éducation- Belgique - Mars 2022
- n°3 Bonne santé et bien-être - Italie - Mai 2022
- n°15 Vie terrestre Conservation de la biodiversité - France - Octobre 2022
- n°13 Action climat - Finlande - Mai 2023

INDSC A.S.B.L. of Beauraing - Belgium

“The Notre Dame du Sacré-Coeur Institute is a secondary school with 820 students and 110 teachers. The INDSC is a school which welcomes each student with their particular history and which helps young people to grow so that they can become fulfilled, thoughtful and responsible adults.

The school is located in a rural area in the province of Namur, the defense of our environment is therefore a concrete objective for which our students have become aware of their central role. We chose the first degree to create a link with the 3rd degree of the fundamental, thus aiming at the development of the common core aroused by the pact of excellence.

Rue de Rochefort, 92 - 5570 Beauraing - Belgium

Collège “La Sologne” - Tigy - France

Our school counts 460 students and 50 staff people, a rural college located 30 km from Orleans. Geographically, our college is located between the Loire Valley and Sologne. The college is, for many of our students, the only place of opening and the only place of social and cultural diversity. We seek to offer the greatest possible openness to our students so that they can project themselves into their future in full awareness of their abilities and their true professional desire. The college have expertise with regard to the environment and we are seeking to obtain the E3D label. This is the reason why our Institute will be in charge of the Agenda 2030 goal n°15 Life on Land.

Topeliuksen koulu – Turku - Finland

There are in total around 50 teachers working in the school. We have 530 students.

All the environmental issues are close to our hearts! As we live close to Baltic sea and all the amazing nature close to us, we are willing to do our best to save it as clean as possible. Children in our school are open minded and very ready for this kind of projects. Our students since primary school follow classes on environmental education, this subject is part of our institutional curricula. Henna Pikkarainen is in charge to run the “Green school” habits as we educate our staff all the time to do good choices and think green. Our students since primary school follow classes on environmental education, this subject is part of our institutional curricula. Our school is in charge for the Agenda 2030 goal n°13 Climate action.

I.C. Lucignano - Italy

The Istituto Comprensivo of Lucignano includes about 700 students. It consists of three different schools, Preschool, three Primary School and two Secondary School.

In our Institute emerge needs related to the social and cultural reality of the territory, in particular the phenomenon of immigration has produced the consequent difficulty of integration, inclusion and socialization.

Our school has always maintained a strong collaboration with the local community, looking for educational projects capable of facilitating the development of an active and conscious citizen, open and accustomed to diversity. We have numerous school libraries and various computer labs.

Our school is in charge for the Agenda 2030 goal n° 3 Good health and well being.
