

# Different seasons

**BY:**

ROBIN, MINDA, ANNE AND COSTANZA

# Italy

- ▶ In Italy in spring the max. temperature is 28°C (in the morning and in the afternoon). In the night the temperature is 19°C. In the night and in the morning is 19°C (at 6:00 am) but in the afternoon the min. temperature is 26°C.
- ▶ The changes are in the polar zone, the melting glaciers or the sic city in Africa or other parts of the world. The very winters: for example, in Italy especially in Tuscany it never snows, and something is cool the temperature and not cold.
- ▶ My favourite season is spring because the weather often is good, and I can walk or ride a bike. The temperature is warm or cool but often is hot. In the spring in Italy there aren't a lot of rains or many windy days.

# Belgium

- ▶ Spring: days = 10°C – 25°C      nights = 0°C – 15°C
- ▶ Spring and summer: Days begin at 6am and finish at 10pm.
- ▶ Fall and winter: Days begin at 8am and finish at 8pm.
- ▶ Yes, during winter, it becomes hotter and hotter every winter and during summer too.
- ▶ My favorite season is the summer because there is the summer holiday, and it is hot so we can go in a swimming pool or in a river and we don't have to work.

# Finland

- ▶ Spring: max. temperature is about 16°C and the min. 0°C.
- ▶ Summer: max. temperature is around 28°C and the min. 12°C. In midsummer the day is 19h long and in Lapland the sun doesn't go down at all.
- ▶ Fall: max. temperature is 14°C and the min. 0°C.
- ▶ Winter: max. temperature is around 0°C and the min. -25°C. During the winter solstice the day is only 6h long and the night is up to 18h or in Lapland sun may not rise at all.
- ▶ Yes, summers are very hot and dry. During winter it's either too warm for snow or very cold (not that much in between anymore).
- ▶ My favourite season is summer because we have a long holiday, so I have a lot of free time. I spend more time outside in the nature with my friends which makes me happy. And of course it is nice when it's warm and I can dive in to a cool lake or the sea.
